-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

It is noted that this application appears to claim subject matter disclosed in prior Application No. 10/006,345, filed 12/03/01. A reference to the prior application must be inserted as the first sentence of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e) or 120. See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. Also, the current status of all nonprovisional parent applications referenced should be included.

Furthermore, Examiner respectfully requests that Applicant provide the associated application serial numbers referenced by Applicant's docket numbers appearing in the first paragraph of this application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi'673.

Art Unit: 3751

The Takeuchi reference discloses an oil change apparatus comprising a control station 50, plural first fluid containers (6,7), plural second containers (4,5), conduit means (see the multiplicity of connecting conduits in Fig. 2), a control panel (proximate reference numerals 16,29 and 19 in Fig.2) and a means for developing fluid driving forces (14,27).

In regard to claims 8 and 9, the entire system including the first and second fluid containers are continuously being acted upon by gravity regardless of the placement or orientation of the device.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,10 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi'673 in view of Elkin'396 et al.

The Takeuchi reference discloses an oil change apparatus (supra), but does not disclose plural control panels. The Elkin'396 et al. reference discloses another oil change apparatus having plural control panels (120,120a,120b) to accommodate the servicing of plural vehicles. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Takeuchi device to have plural control panels in view of the teachings of the Elkin et al. reference to accommodate the servicing of plural vehicles.

Art Unit: 3751

***Conclusion***

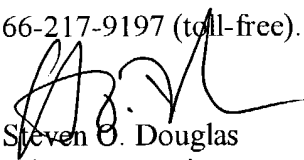

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Bertschinger, Dixon et al. and Viken references pertain to other automotive fluid change devices.

Claims 3-6 and 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
